

Red Roo & AgTrak Announce Product Acquisition

MELBOURNE, May 2007 - - Red Roo Sales & Service Company Pty Ltd announces the acquisition of the AgTrak built SM2 series stump grinders, one of the most innovative stump grinders on the market today.

Effective immediately, Tony Palmer of AgTrak will retire from manufacturing the SM2 machines.

“We are pleased to have been able to come to an arrangement with Tony and look forward to having his assistance in improving an already successful design. Tony has decades of experience in the industry and we appreciate his efforts,” says James Kerr, Managing Director of Red Roo.

With improvements made to the SM2, the units will be built and marketed by Red Roo as the SH series. The addition of the SHP400 and the release of the SH400 will complement Red Roo’s existing stump grinders, the popular SG series.

Red Roo will support parts and service for existing AgTrak customers that own SM2 series stump grinders.
