

Double-handed arborist rope clamp

The dual-density molding provides a wide supporting surface at the bottom and excellent grip.

The specific planed catches limit the risk of snagging.

Petzl deepens the product line designed for arborists with the ASCENTREE double-handed rope clamp.

This new double handle allows the user to ascend a double rope with maximum comfort. The design and materials of this product make it ergonomic and user-friendly, adapted for intense use.

Using the ASCENTREE with the PANTIN offers a good alternative to the footlock.

Selling points

- Designed for ascending double ropes in trees using the "footlock" technique or with two PANTIN foot ascenders
- Ergonomic molded handle allows a comfortable yet powerful grip
- Cam is totally integrated into the body of the rope clamp to prevent rubbing
- Large handles can be used with thick gloves
- Lower holes for connecting a lanyard
- Upper holes through which a carabiner attaches the device to the rope (useful for back-up belays)
