

3

3. SOLD ONLY IN PRODUCTION QUANTITIES

These bars will only be manufactured in quantities of 500 per part number, with price breaks for larger order quantities.

- +Bar & Chain Combo Pack - Consumer
- +Chain Saw Mini Cut Laminated Bars
- +Packaged Consumer Chain 3/8" .050" or .043" Gauge Loops

It is expected that customers will stock either a consumer level laminated bar sold in conjunction with a packaged chain loop or laminated bar & chain combo packages.

+Light Weight Pole Pruner Bars.

GB has a totally new range of 0.043" gauge extra light weight plastic filled pole pruner bars in the following part no's:

- SW12-43OR
- SW14-43OR
- PO10-43OR
- PO12-43OR

- +Harvester rim sprockets - .404"
- +Harvester Rim Sprockets - 3/4"
- +Chain Saw Rim Sprockets

GB will continue to offer a complete range on chainsaw and harvester drive sprockets.

+Chain Saw Chain - GB - EVO

GB is currently developing a complete range of saw chain and is expecting to launch the sale of these chains in early 2010 with Harvester chains ready for sale at the end of 2010.

BAR & SPROCKET RANGE AND PRICING POLICY

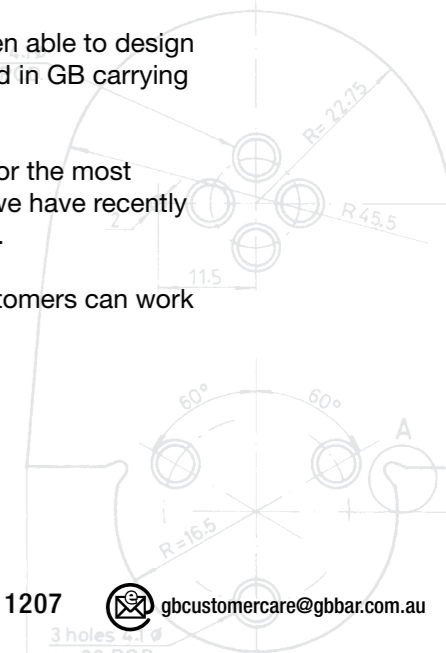

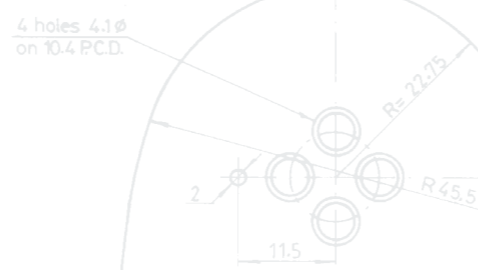

At GB Manufacturing, we are extremely proud of the fact that we have always been able to design and build a bar and sprocket to suit every application. Over time, this has resulted in GB carrying an extremely wide range – much of which served multiple purposes.

In an effort to ensure that the best possible service and price can be maintained for the most popular part numbers and to ensure that a complete range can still be supplied, we have recently undergone a rationalisation of our product range to eliminate duplicated products.

The following policies have been established to provide a framework that our customers can work within but which can be adapted to suit individual customer needs if required.

There will be three different Product Categories:

- Made to Order
- Made for Stock
- Sold only in Production Quantities

+61 3 9300 5555 +61 3 9312 1207 gbcustomer@gbbar.com.au

+61 3 9300 5555 +61 3 9312 1207 gbcustomer@gbbar.com.au

1. MADE TO ORDER

These bars will be made only to specific order with a minimum order quantity of 10 bars.

+Chain Saw Pro Top Titanium CN40 Bars

This range will cover all replacement nose .325", 3/8" std and .404" for bars 20" to 42".

This is our premium chainsaw bar and will out perform any product on the market.

.404" replacement nose bars will only be available in CN40 bars.

+Mill Bars Double Ender - .404"

+Chain Saw Extra Long Sprocket Nose Bars

+Chain Saw Extra Long Hard Nose Bars

The core range is based on our HS mount and includes lengths from 44" to 87".

The HS mount has been designed to suit all medium to large Husqvarna and Stihl Chainsaws.

Adjusting slot spacers are supplied with these bars to accommodate the 3 different chainsaw mounting bolts on these saws.

Other bars will be made to suit more specific customer requirements, but it is recommended that customers stock the HS mount to minimise stocking requirements.

GB Harvester Products

+Mill Bars Double Ender - 3/4" Pitch (.122" Groove)

The 3/4" pitch double ender bars are made only to suit specific requirements. The most popular bars are made to suit CTR slashers, Holtec and Shindaiwa pallet cutting machines.

+Harvester Bar - 3/4" Pitch Sprocket Nose (.122" Groove)

+Harvester Bar - 3/4" Pitch Stellite Tip (.122" Groove)

The 3/4" pitch harvester bars are made only to suit individual applications.

+Harvester Bar .404" Solid Sprocket Nose

+Harvester Bar .404" Replacement Nose

The .404" pitch harvester bar range is centered on the original European mounts HM, FM and WM. (2 and 4 hole) and the more modern range of HF, FF and WF mounts. The HM mount has been designed to replace most of the FM and WM mounts and should only be used if the customer doesn't want to stock the FM and WM bar. It is our intention to eliminate the solid sprocket nose bar and replace it with the replacement nose bar. When we have the increased capacity this will allow us to lower the price of this bar. Customers should feel free to express any concerns they may have about this change.

+Harvester Bar .404" Urea - (single side only)

+Harvester Bar .404" Urea - (two sides)

The 2 sided Urea Harvester is still a single use Urea bar. These bars have been designed in an attempt to reduce the stock holding of urea bars for our customers and should not be stocked along with the single sided bars as this would only increase your stock needs.

+Harvester Bar Extra Wide Sprocket Nose .404"

This is a limited demand bar. Some customers still ask for these bars, but it is suggested that distributors do not stock them.

2. MADE FOR STOCK

These bars will be made to supply on demand, with price breaks for large order quantities. Sprockets not held in stock will be made only with minimum order quantities of 500.

+Chain Saw Sprocket Spur Drive

+Chain Saw Sprocket Centre Drive

Bars not held in stock will be made only with minimum order quantities of 100.

+Chain Saw Professional Pro Top Bars

The original Pro Top bar will only be stocked in

SN20-63PA
SN20-63PJ
SN20-50PA
HV20-50PA
HV20-58PA
HV22-58PA
EX20-50PA

This list of bars will be stocked in duplicate range in the ARBOR PRO series.

It will be available in other sizes if minimum order quantities are met.

+Chain Saw Arbortech WR & WF

This range covers professional replacement nose bars for small chainsaws. 3/8"LP and .325" pitch .050" gauge only.

+Chain Saw Arbor Pro MG & MH

This range covers professional replacement nose bars for medium size saws up to 20". 3/8", .325" only in .050", .058" and .063" gauge.

+Chain Saw Professional Hard Top Bars

GB will continue to manufacture a complete range of hard nose bars and stock a select range of bars as follows:

SN20-63
SLD25-63
SLD36-63
EX20-50
HV20-58

+Chain Saw Carving Bars

GB will manufacture and stock a complete range of Hard Nose Carving bars. 8", 10", 12", 14", 16", 18" in both dime and quarter tip.
